

RESOLUTION FOR PLAN REVISION

RESOLUTION OF THE COUNCIL OF NORTHUMBERLAND BOROUGH,
NORTHUMBERLAND COUNTY, PENNSYLVANIA (hereinafter "the municipality").

WHEREAS, Section 5 of the Act of January 24, 1966, P.L. 1535, No. 537, known as the "Pennsylvania Sewage Facilities Act", as amended, and the Rules and Regulations of the Department of Environmental Protection (Department) adopted thereunder, Chapter 71 of Title 25 of the Pennsylvania Code, requires the municipality to adopt an Official Sewage Facilities Plan providing for sewage services adequate to prevent contamination of waters and/or environmental health hazards with sewage wastes, and to revise said plan whenever it is necessary to meet the sewage disposal needs of the municipality, and

WHEREAS, NORTHUMBERLAND BOROUGH COUNCIL has prepared a SPECIAL ACT 537 PLAN, which provides for sewage facilities in Northumberland Borough and portions of Point Township, and

WHEREAS, Northumberland Borough finds that the Facility Plan described above conforms to applicable zoning, subdivision, other municipal ordinances and plans and to a comprehensive program of pollution control and water quality management.

NOW, THEREFORE, BE IT RESOLVED that the Council of the Borough of Northumberland hereby adopt and submit to the Department of Environmental Protection for its approval as a revision to the "Official Plan" of the municipality, the above referenced Facility Plan. The municipality hereby assures the Department of the complete and timely implementation of the said plan as required by law. (Section 5, Pennsylvania Sewage Facilities Act as amended.)

The alternative of choice to be implemented focuses on the immediate needs of the NSA collection, conveyance, and treatment systems and outlines additional needs as long-term improvements. The immediate, or short-term needs calls for the construction of a new wastewater pumping station at the existing Queen Street pumping station site, and improvements to be made to the existing wastewater treatment plant which include the upgrade of the chlorine system, the installation of variable frequency drives for the return activated sludge pumping system, and installation of a flow splitting box to improve the process operations. Long-term alternatives include the interconnection of

the existing treatment tanks, upgrade of the emergency generator, installation of drains in the chlorine contact tanks, installation of telescoping valves on digester tanks 1 and 2, the upgrade of the supernatant pumping station.

The key implementation activities/dates include:

MILESTONE	DURATION	TIME FROM FUNDING APPROVAL
Receive Approval for Special Act 537 Study		July 1997
Initiate Design and Engineering	1 Month	August 1997
